

COVID-19

WHAT WE ARE DOING

RESPONDING TO COVID-19 • KEEPING YOU SAFE IS OUR FIRST PRIORITY.

We have learned a lot since the early days of the COVID-19 Pandemic. First and foremost is the need for constant vigilance in monitoring every detail of daily life in our facility to protect residents and rehab patients.

What we are doing:

FEDERAL AND STATE GUIDANCE. Our nursing, dietary, housekeeping, and laundry departments follow all guidance from the Centers for Disease Control (CDC) and the Rhode Island Department of Health (RIDOH)—to the letter. New information and new insights into the virus come out daily. We stay on top of it every day.

PRIVATE ROOMS. All new patients are admitted into private rooms. Private rooms are an essential feature of any plan to mitigate the risk of infection. Per CDC and RIDOH guidelines, all unvaccinated newly admitted patients must complete a 14-day quarantine.

TESTING. Unvaccinated Residents and Staff are tested bi-weekly. Vaccinated Residents and Staff are tested monthly. Test results are disclosed as soon as available to families and residents in the event of any positive cases, and overall current numbers summarized again in a weekly letter.

VACCINATIONS. We strongly urge everyone who is eligible to be vaccinated. Residents and Staff were first offered the Pfizer-BioNTech COVID-19 vaccine in January, 2021. Vaccine clinics are held regularly at the facility for residents and staff who wish to be vaccinated. Staff vaccination data is reported monthly.

PERSONAL PROTECTIVE EQUIPMENT (PPE). All staff members are provided with a complete and ample supply of masks, gowns, face shields and other PPE. Residents and rehab patients are provided with masks and other appropriate PPE as needed. The facility is also investing in specialized equipment to sanitize and reuse masks to protect against the possibility of any future PPE shortages.

ENVIRONMENT. Our housekeeping staff works tirelessly to clean and disinfect every inch of our facility. We use state-of-the-art Electrostatic Disinfectant Spraying technology, environmentally safe and EPA registered. All common areas are aggressively sanitized using enhanced cleaning protocols with particular attention to vital high touch points in common areas. Resident rooms are cleaned and sanitized with extra attention to resident personal items and high touch areas. All linens and personal clothing are washed in accordance with Health Department and CDC guidelines.

STAFF SURVEILLANCE. Staff members are screened daily for symptoms before starting work. Those not feeling well are directed to stay home. Vigilant use of PPE, good hand hygiene, and social distancing are practiced throughout the workshift.

To learn more about our services and how we are dealing with COVID-19, please contact our admissions department by calling (401) 353-1710 or write to Admissions@GCNCare.com.

COVID-19 Update	June, 24 2021	
Covid-19 Cases In-House	RESIDENTS	STAFF
	none	none
Staff Vaccination Data	Personnel	%
Total Number of Personnel	163	100%
Total Fully-Vaccinated	131	80.4%
Total Partially Vaccinated		

Fully-vaccinated means one has received both doses of either the Pfizer-BioNTech or Moderna vaccines, or a single dose of the Johnson & Johnson vaccine.

Partially-vaccinated means one has received one dose of either the Pfizer-BioNTech or Moderna vaccines.
